Office Action Summary

Art Unit: 3737

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3 - 4, 7 - 16, 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arditi (US5,526,816). Arditi is argued to provide an image characterizable as 'blended' insofar as col. 6 line 36 - col. 7 line 33 suggests arithmetic and/or logic combinations so as to produce a composite image of fundamental and harmonic components so as to highlight contrast agent effects. Note that whereas harmonics typically would be emphasized in deep tissue, the location where harmonic emphasis would occur within the image would be fortuitously related to the location of collecting of contrast agent within the region under study.

Allowable Subject Matter

3. Claims 2 and 5 - 6²⁷ are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3737

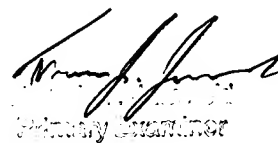

4. Claims 17 - 25 are allowed.

Zhao (US5897500) and Zhao et al (US6048316) of ineffective date are cited to show the state of the art regarding blended fundamental and harmonic imaging.
